Integrated Vent Solutions Launches as New England’s Sole Distributor of VOCSN, the First Portable Unified Respiratory System

VOCSN integrates five separate medical devices into one mobile device

NORWOOD, Mass., – August 28, 2018 – Integrated Vent Solutions (IVS) today announced the company has launched and is the sole distributor in New England of VOCSN, a unified respiratory system that integrates five separate medical devices including a ventilator, oxygen concentrator, cough assist, suction, and nebulizer. IVS is founded by a team of seasoned healthcare professionals with deep expertise in the home medical equipment industry. The management team is comprised of Eric Mongeau, Managing Director and Bob Nelson, Director of Sales. VOCSN is a product of [Ventec Life Systems](#).

“Patients need, and deserve, medical devices that improve their health and make their lives easier. We are proud to provide our patients with a device that does both,” said Eric Mongeau. “VOCSN will dramatically enhance the day-to-day and long-term quality of life for patients and their families.”

Ventec’s product, VOCSN, includes numerous features and patient benefits:

- **Critical Care Ventilator** – VOCSN provides invasive, noninvasive, and mouthpiece ventilation across a comprehensive set of modes and settings to meet patient needs. The advanced ventilation technology combines responsive leak and circuit compensation as well as precision flow trigger controls to enable comfortable breathing and accurate therapy for patients 5 kg and above.
- **Oxygen Concentrator** – VOCSN’s internal oxygen concentrator and Oxygen Direct™ system deliver the equivalent of 6 L/min of oxygen; external oxygen sources can be connected as needed.
- **Touch Button Cough** – Touch Button Cough™ therapy can be activated in seconds, without changing the patient circuit.
- **Hospital Grade Suction** – The quiet hospital grade suction system provides quiet and effective airway clearance with consistent and precise vacuum pressure.
- **High-Performance Nebulizer** – VOCSN automatically compensates for the airflow from the ventilator when the nebulizer drive is active, records data about each treatment, and automatically turns off the nebulizer once the therapy timer is complete.

“At Integrated Vent Solutions, our patients are, and always will be, our number one priority,” said Bob Nelson. “With VOCSN, we know that our patients not only experience the highest quality of care and customer service, they also receive peace of mind from a life-changing respiratory device.”

VOCSN has been cleared for patient use by the FDA and more information can be found at www.venteclife.com.

About Ventec Life Systems

Ventec Life Systems is redefining respiratory care to improve patient outcomes and reduce caregiver challenges in the hospital and home. Ventec's leading product, VOCSN, seamlessly integrates five separate devices including a ventilator, oxygen concentrator, cough assist, suction, and nebulizer into one unified respiratory system. The team's history of patient-centric design includes more than 10 care changing respiratory devices and more than 40 patents. To learn more about Ventec Life Systems, visit www.venteclife.com

About Integrated Vent Solutions

Integrated Vent Solutions was established in 2018 to embrace VOCSN, the first portable device to combine five separate devices including a ventilator, oxygen concentrator, cough assist, suction, and nebulizer into one unified respiratory system. VOCSN is simple, mobile, and care changing for pediatric and adult patients and caregivers from the hospital to home. With a combined 75 years of experience in Respiratory and Homecare, the Integrated Vent Solutions team is passionate about combining the latest technology with unmatched customer service to deliver high quality, seamless care.
